

Intelligent DemandSM

Effectively control energy costs.

Intelligent Demand

Demand response programs help improve system reliability, prevent blackouts and brownouts, increase electricity system capacity, and more cost-effectively utilize infrastructure investments. As the recognized leader in demand management, Comverge has the expertise and Intelligent Demand solutions to address the future of energy management.

An important energy resource

Demand response is becoming an increasingly more important asset to commercial, industrial, and utility energy management – and its significance will continue to grow with advances in smart grid infrastructure. Our Intelligent Demand solutions complete the energy mix by providing cost-effective and efficient means of taking energy off the grid during peak times. Building on traditional programs, Intelligent Demand introduces the industry to informed demand response – the next-generation of energy management that encourages users to take a more proactive role in consuming energy.

Balance Energy
Supply and Demand

Predict and Shape
Available DR Load

Empower
Customers

Real-time Two-way
Communication

Benefits

- Balance energy supply and demand
- Predict available demand-responsive load and precisely shape that load
- Optimize distribution systems' operations
- Empower customers to take a more proactive role in managing energy consumption through price response and demand response programs, real-time energy information, and predictive energy utilization
- Provide real-time, two-way communication

Linking customers and utilities

With the Intelligent Demand solution, you receive the hardware, software, systems, and consultation that will enable you to provide the capacity for demand response.

Additionally, you can select the level of investment that best suits your facility's needs – from our flexible delivery model to our fully outsourced, pay-for-performance solution.

- IntelliSOURCE™ – A comprehensive enterprise platform that provides support for the entire business delivery chain – from customer acquisition, to demand response management, to resource optimization
- Consistent infrastructure for command and control
 - Smart thermostats
 - Intelligent load control switches
 - Energy management platforms for commercial and industrial customers
- Customer empowerment programs
 - Marketing and recruitment
 - Measurement and verification
 - Installation and call center support
 - Customer service

Support for every aspect of intelligent energy management

Through the industry's only proven, comprehensive set of intelligent hardware, software, and services solutions, Comverge delivers the insight and control that helps optimize energy consumption. This portfolio – coupled with our proven expertise – has earned us the trust of energy providers and consumers across the country and enables us to positively benefit your operations and bottom lines.

• Intelligent hardware

- IntelliTEMP™ – Empower consumers to gain control of energy use through dynamic programmable thermostats
- IntelliFOCUS™ – Enable consumers to monitor and manage usage in real time with an easy-to-read energy consumption display unit
- IntelliPEAK™ – Curtail air conditioner usage during events and ensure locations have signal receptions
- IntelliCONNECT™ – Send data over a cellular or broadband network at least twice an hour for a near real-time look at current usage

• Intelligent software

- IntelliSOURCE™ – Establish communication between energy providers and consumers, and receive a consistent infrastructure for command and control of energy management programs

• Intelligent services

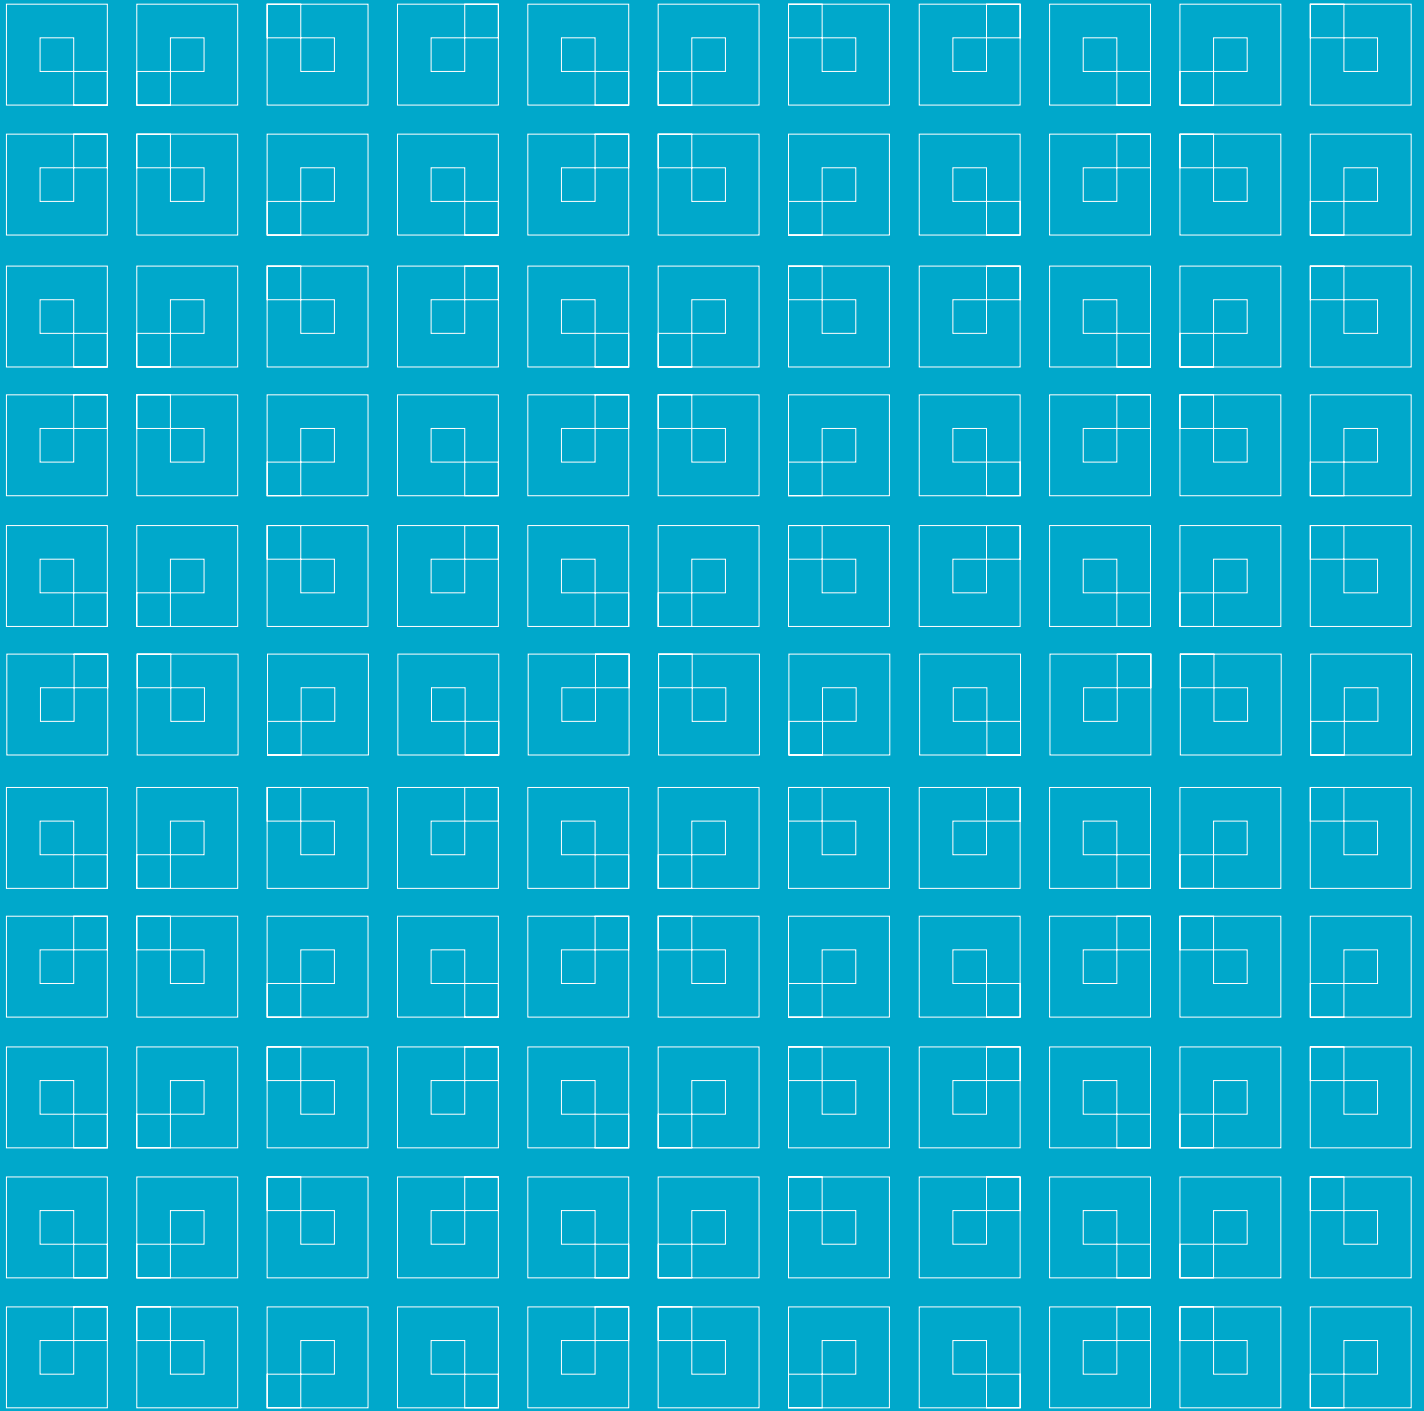

- IntelliMARKET™ – Gauge program effectiveness and achieve greater program efficiencies to ensure you get the best return from your load reduction programs

- IntelliPLAN™ – Work with experienced energy management professionals to develop and implement tailored strategies for optimizing energy use
- IntelliSUPPORT™ – Count on Comverge to handle all aspects of installation and customer care for demand response and time-of-use programs
- IntelliTECH™ – Ensure Comverge software solutions are effectively deployed and integrated with your applications
- Comverge Network Operations Center (NOC) – Manage and execute energy consumption strategies with help from a knowledgeable resource available 24x7

Why Comverge?

For more than 30 years, we have earned the trust of our customers by making the complex simple.

- We service 60-percent of the existing residential demand response install base
- Our solutions are designed to expand capabilities to accommodate your changing and expanding needs
- We have long-term contracts to provide energy efficiency programs to PG&E, SMECO, PacifiCorp, PNM, APS, and other leading utilities throughout the U.S.
- Through IntelliSOURCE, we provide a single platform that enables you to deliver innovative energy management applications to your customers – both residential and commercial and industrial
