

# IntelliCONNECT™

Receive fast, reliable, up-to-date information of usage.

# IntelliCONNECT

With the growth of smart devices within a customer’s premise, the need to manage these smart devices is more important than ever. Converge IntelliCONNECT provides a two-way interactive communication system between customers and their utility provider. With IntelliCONNECT, data is sent over the customer’s broadband connection, providing intelligence control and telemetry data. This system can be installed without an AMI network initially and then migrate to the AMI network in the future once AMI smart meter is installed.

## Benefits and Features

- Connects smart devices to the customer’s existing IP network
- Uploads rich telemetry data from the smart devices to gain insight on energy consumption
- Provides high speed, low latency path for device control, including demand response, remote configuration and settings
- ZigBee Smart Energy Profile V1.0 compliant
- Can be installed as an independent ZigBee network or join to another ZigBee network (such as AMI)
- Upload near real-time meter data to IP network when joined to smart meter ZigBee HAN
- Plug and play – no need to set firewall or security settings
- No software installation required
